Purpose

The purpose of this document is to provide a clear description of our mission, identity, and values, as well as display a structured direction of design through color, typography, and element use. All in all, this deck should provide a comprehensive and helpful baseline for the operations of the **UC Davis** chapter.

Brand Overview

Who we are

180 Degrees Consulting UC Davis is a student-run pro-bono consulting chapter connecting nonprofits and social enterprises with motivated student consulting teams. We operate in the Yolo County and Sacramento area. Working with organizations such as food banks, animal shelters, and environmental non-profits, as well as socially motivated organizations.

Our mission

We seek to improve local non-profits in the Yolo County and Sacramento region through proposing and implementing tailored and thoughtful business strategy solutions. We aim to create a group of driven, passionate, and professional students who care about cultivating culture and producing quality work beyond the resume. We pride ourselves in delivering excellent work that goes above and beyond expectations. We seek to understand our clients to the fullest degree and adopt a humble approach to improving the organizations we work with.

02 — LOGO

Our Logo

Primary long — use on white or light backgrounds

Used in title slide, comprehensive logo representing our full identity, used less frequent than our small logo due to its size and wordiness.

Mark only — for dark backgrounds, favicons, and small spaces

Use to mark slides, ideally in corners on pitch decks and presentation, logo for most social platform profiles

Color Palette

Charcoal

#434343

Primary text, dark backgrounds, headers

Brand Green

#55B441

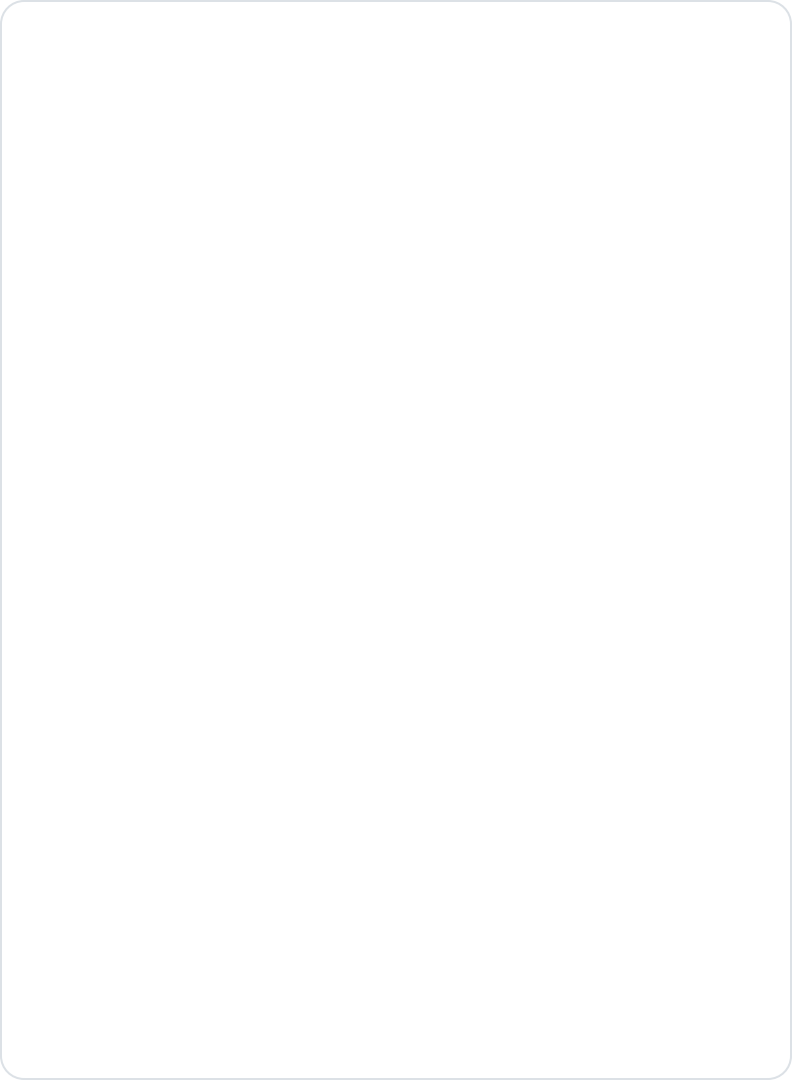

Primary accent — CTAs, highlights, icons

Deep Green

#519D39

Hover states, secondary accents, shadows on green

White

#FFFFFF

Backgrounds, negative space, reversed text

Typography

DISPLAY & HEADINGS

Proxima Nova

Used for mostly all social media posts and pitch decks. Our standard font for the **UC Davis** chapter.

MISC.

Lato

Use with discretion, this is included because it aligns with the 180 standard slide resources deck, can use in documentation but conflicts if used with montserrat or proxima nova.

BODY & UI

Montserrat

Used for body copy, labels, captions, and interface text across decks, proposals, and the website. Essentially a supplement for Proxima Nova. Make decisions based on cohesion and consistency.

Type Scale

38pt / Bold	Section Headings
28pt / Light	Subheadings and pull quotes
25pt / Regular	Body copy and paragraph text

These three sizes cover most needs across decks and documents — 38pt bold for headings, 28pt light for supporting subheads, and 25pt regular for body text. Add notes on when to deviate from this scale. Note that Montserrat is a naturally larger font, these sizes are suggested for Proxima Nova, so adjust accordingly.

Thank You

This guide is a living document — we will update it as the brand evolves, and reach out with questions on applying it to new materials.
